

Company Equipment Policy

Promote Health Analytics Pty Ltd

Company Equipment Policy

Document ID: HR-POL-009

Company: Promote Health Analytics Pty Ltd

Version: 1.2

Effective date: 2026-01-01

Owner: Information Technology

Status: active

Applies to: full_time, part_time, contractor, probation ## 1. Purpose

This policy defines how Promote Health Analytics Pty Ltd issues, records, uses, supports, replaces, and recovers company equipment.

2. Scope

This policy applies to employees, contractors, and other workers who receive company-owned or company-managed equipment.

3. Definitions

3.1 Company equipment

A device, accessory, security token, or other asset owned or managed by the company.

3.2 Asset record

The record linking equipment to a worker, location, status, and return obligation.

3.3 Standard equipment

The approved equipment set for a role or work arrangement.

4. Policy Requirements

4.1 Issue and assignment

Equipment must be recorded against the receiving worker before use. The worker must acknowledge receipt and must not transfer equipment to another person without approval.

4.2 Secure use

Company equipment must be used consistently with HR-POL-005 Information Security and Acceptable Use Policy. The worker must not disable management controls or install unapproved software.

4.3 Care and storage

The worker must take reasonable care, protect equipment from theft or damage, and keep it under authorised control. Equipment must not be left unattended in an unsecured vehicle or public location.

4.4 Personal and household use

Incidental personal use may be permitted where it is lawful, limited, and does not create security or operational risk. Other household members must not use company equipment.

5. Procedures or Application

5.1 Support and faults

The worker must report faults through the approved support channel and must not arrange unauthorised repair. Information Technology determines whether to repair, replace, or withdraw the equipment.

5.2 Loss, theft, or damage

Loss or theft must be reported immediately and handled under HR-POL-005 incident reporting. Damage must be reported promptly with accurate circumstances.

5.3 Replacement

Replacement depends on role need, asset condition, standard lifecycle, supportability, and security. An employee must not personally purchase a replacement and assume reimbursement without approval.

5.4 Equipment return

Company equipment must be returned within five business days after employment ends or when requested. The company may provide shipping or return instructions. The worker must not retain company data after return.

5.5 Asset changes and transfer

A role, location, or manager change may alter the equipment required. The manager should review assigned assets and request changes through the approved process. A worker must not transfer an asset directly to another worker. Information Technology updates the asset record and confirms any required reset, inspection, or security action.

5.6 Accessories and consumables

Standard accessories may be issued where required for the role or approved work arrangement. Personal preference alone does not require the company to provide a premium or duplicate item. Consumables and low-value accessories should be requested through the approved supply process where available rather than purchased personally.

5.7 Data before repair or return

Before repair, replacement, or return, the worker should follow Information Technology instructions for synchronisation, backup, account removal, or secure handling. The worker must not copy company information to personal storage as a backup method. Information Technology determines whether data can be recovered from a damaged device and whether secure wiping is required.

6. Exceptions and Escalation

- A temporary extension to the return deadline requires written approval and a documented return date.
 - Specialised equipment outside the standard set requires manager, budget-owner, and technical approval. ##
7. Responsibilities

7.1 Workers

Use, protect, and return assigned equipment.

7.2 Managers

Confirm role need and notify relevant teams of role or employment changes.

7.3 Information Technology

Maintain asset records, support equipment, and manage returns.

7.4 Information Security

Maintain device controls and respond to security incidents.

8. Decision Rules

- If equipment is lost or stolen, report it immediately and follow HR-POL-005 incident procedures.
- If employment ends or return is requested, return equipment within five business days unless a written extension exists.
- If a worker wants a non-standard item, obtain approval before purchase or issue. ## 9. Examples

9.1 Laptop fault

An employee reports a failing laptop through the support channel and receives an approved replacement.

9.2 End of employment

A departing employee follows the shipping instructions and returns all listed equipment within five business days.

10. Frequently Asked Questions

10.1 Can a family member use my work laptop?

No. Family members and other unauthorised people must not use company equipment.

10.2 Can I have a local repair shop fix the device?

Not without Information Technology approval.

10.3 Can I buy a replacement and claim it?

Only where the purchase is approved under the applicable equipment and expense processes.
